### About the Program

This program aims to train audiologists skilled in evaluating the hearing of patients across all age groups. Graduates will be equipped to offer tailored solutions, support both patients and their families, and lead awareness campaigns on noise pollution, hearing impairments, and their impact on personal development and quality of life.

### Target Audience

- Speech and Language Therapists
- Medical Doctors

### By the end of this program, you will be able to:

- Perform accurate hearing screenings and assessments tailored to each patient's needs, using evidence-based methods and current research.
- Collaborate effectively with ENT specialists, neurologists, audiologists, speech therapists, and other healthcare professionals.
- Communicate clearly with patients, families, and care teams to support informed decisions and effective treatment.
- Serve as a trusted expert in audiophonology, uphold ethical standards, and promote better quality of life for individuals with hearing loss.

### Training Program

#### Courses (13 Cr.)

Courses are delivered over six months, with classes held two Saturdays per month. The program is organized into four main areas:

- Hearing loss in the 21<sup>st</sup> century
- Clinical Audiology: Diagnosing and interpreting hearing disorders
- Hearing Aids: Selection, function, and technological advances
- Preventing and managing hearing loss across all ages
- Presbycusis: Diagnostic and therapeutic approaches, family and professional support
- Integration seminar

#### Internships (2 Cr.)

- 50 hours in an audiology setting over several weeks to develop proficiency in hearing assessments
- 5 hours with a hearing aid specialist
- 5 hours in a center for children with hearing impairments

### Structure and Requirements

**Duration:** 14 Saturdays  
(2 per month, 6 hours each)  
+ 60-hour internship

**Location:** CIS Campus, Saint Joseph University of Beirut (in-person)

**Assessment:** Written final exam, oral case presentation with written report, and internship completion

### Instructors

ENT specialists and phoniaticians (HDF), speech and language therapists (ISO and HDF), and highly qualified hearing aid specialists

### Career Opportunities

**Hospitals and Clinics:** Collaborating with ENT and neurology departments

**Specialized Centers and Institutes:** Focusing on individuals with hearing impairments

### Registration and Contact

**Registration Deadline:** June 30, 2025

**Registration Fee:** Equivalent to 15 credits

**Online Registration:**
