

Al Mazeed/USJ en Mission

Al Mazeed is an NGO stemming from an initiative, *USJ en Mission*, that USJ students launched in March 2020. Driven by the concern of our *Alma Mater* to nurture **every person and the whole person**, and to push its students to actively engage in building a more just society and promoting peace, the USJ student bodies mobilized to support fellow students, following the severe sanitary, financial, social and economic crisis that has been affecting Lebanon since 2019, the Beirut Port explosion, and the ongoing insecurity experienced by the Lebanese people.

Today, Al Mazeed/*USJ en Mission* strives to guide, support, and educate women and men, dreamers and changemakers, capable of providing creative solutions to reinvent the present and inspire a bright future. The goal is to bring about structural change in society, fostering an ever more humane humanity and a fairer world. We aim to care for our common home, respecting and safeguarding Creation through projects developed and implemented with and by our young engines of change, the sole guarantors of a better future. Our primary focus is on the members of the USJ and HDF community – retirees, employees, instructors, and students – one united and supportive family trying to overcome these challenges together. Our projects, whether ecological, socio-humanitarian, cultural, or sanitary, all aim at the development and fulfillment of individuals, empowering them to take control of their lives.
