

## DENTAL CARE CENTER (CSD)

The Dental Care Center (CSD) of the Faculty of Dental Medicine (FMD) is an integrated clinical training facility for students. It houses 112 dental chairs spread across five rooms, covering all dental specialties. Our center is equipped with state-of-the-art technology, enabling us to provide high-quality care.

Every year, we welcome around 3,500 patients. In addition to routine dental care, we offer treatment options in highly specialized fields. Our Department of Digital, Virtual and Artificial Intelligence Dentistry, as well as specialized units such as the Laser and Trauma Unit, enhance our range of services.

We also provide dental care for individuals with specific needs.
