

CENTER FOR DIAGNOSIS AND THERAPY IN SPEECH AND LANGUAGE THERAPY (CDSO)

The Center for Diagnosis and Therapy in Speech and Language Therapy (CDSO) develops, validates, and applies tools and protocols for assessment, intervention, and parental support in clinical and research settings. It addresses disorders of communication, oral and written language, mathematical reasoning, voice, and swallowing in children and adult patients. This approach helps clarify pathological mechanisms and leads to effective, evidence-based practices in a multilingual context.
