

# FACULTY OF NURSING SCIENCE (FSI)

## HISTORY

---

Founded in 1922, the School of Midwifery, affiliated with the Faculty of Medicine, introduced a dual program for nurses and visiting nurses in 1929. These nurses were trained to “contribute by providing care for patients at home as directed by the doctors, offering emergency aid, and administering necessary treatments.” The corresponding diplomas were awarded until 1938-1939.

In December 1942, a School for Visiting Nurses was established at the Faculty of Medicine of the Saint Joseph University of Beirut. Its aim was to staff positions that the Ministry of Hygiene and Public Assistance sought to create across Lebanon’s villages. From the 1949 academic year, the School also started training hospital nurses. On May 31, 1948, the French Ministry of Public Health granted the School the authority to award the French State Diploma in Nursing.

The Lebanese Ministry of National Education recognized the School as a Higher Education Institute on April 28, 1947, a status that was confirmed on March 7, 1962, in line with the Higher Education Law of December 26, 1961. Originally affiliated with the Faculty of Medicine at the Saint Joseph University of Beirut, the School became an independent entity under the University on July 20, 1980, and was elevated to Faculty status on February 14, 1981. Since 1972, continuing education programs (University Diploma) have been offered alongside the Bachelor, and the Master added in 1982. A PhD program was launched in September 2024.

## MISSION

---

The Faculty of Nursing Science at the Saint Joseph University of Beirut is committed to advancing and sharing knowledge in the field of nursing. Its mission is to offer students academic training in nursing care that is specifically adapted to the Lebanese socio-cultural context. The Faculty plays a key role in training professionals capable of updating and innovating care practices that meet the needs of society from a humanistic (caring) perspective. Research in nursing conducted at the Faculty enriches the theoretical teaching and improves professional practice. The Faculty also actively engages in national and international partnership projects aimed at generating new knowledge and advancing nursing care in Lebanon.

### VISION

The vision of the Faculty of Nursing Science (FSI) aligns with the USJ 2025 Vision. As an institution, the Faculty aims to be the benchmark for excellence in university education in nursing science while fostering a supportive and encouraging learning environment. It will continue to promote nursing research as a fundamental component of its curriculum and actively encourage interdisciplinary collaboration at the national and international levels. The Faculty remains committed to prioritizing student needs and consistently strive to meet labor market demands.
