

A University diploma in “HEALTH INFORMATION ANALYSIS”

This diploma program aims at developing skills for the acquisition, manipulation and transformation of data into meaningful information, to help top management make informed decisions.

This program allows you to work at many institutions such as:

- Hospitals; Primary health care centers; laboratories and polyclinics;
- Research centers;
- Ministries of Health, Environment, Social Affairs, Agriculture;
- NSSF;
- Insurance companies and all organizations providing health coverage to their employees and members;
- NGO’s and international organizations.

Prerequisite

This program is open to any health or administrative professional, holder of a bachelor degree (bacc + 3) or a technical diploma (TS).

Courses will start the first week of October 2021

Tuesdays and Thursdays from 5pm to 8pm

The registration file can be downloaded from the link: https://www.usj.edu.lb/intranet/actu/pdf/10925_1687.pdf
