

Acupuncture Brings You to a New Field of Medicine

Friday may 27, 2011

18h - 20h

Medical Science Campus

Amphi C

Presented by **Pr Zhong Qiang-Wei**

From Tianjin University of Traditional Chinese Medicine

As a doctor, or physiotherapist, when you are facing with your patient, what is more important, focusing on the disease or different human body, you are only solving the local problem or concerning the health of your patient.

Acupuncture, with thousands years of history, will tell you how Traditional Chinese Medicine think about human being, how TCM think about different diseases, how TCM and Acupuncture deal with the relation between each disease and human body-holism, and how Acupuncture relieve the suffering of patients with only a needle

Differentiation according to different syndromes and signs. Acupuncture will give you a new way of thinking on human being, Acupuncture will bring you to a new field of Medicine.
