

Survey on Perceptions of Syrian Refugees in Lebanon

Between resilience and vulnerability

A STUDY DONE BY THE POLITICAL SCIENCE INTITUTE AT USJ
AND FUNDED BY UNHCR

CAROLE ALSHARABATI (carole.alsharabati@usj.edu.lb)

Final February 27, 2017

Syrian refugees are becoming increasingly vulnerable while worries are rising among Lebanese decision-makers.

Dynamics in relationships between Syrian refugees and host communities are fluctuating as the Syrian crisis continues.

The Lebanese Government has taken several measures on Lebanon's borders to control the movement of Syrian nationals, in efforts to manage the influx of Syrians into the country.

In order to have a legal status, the following is needed: registration fee of \$200 (recently removed), sponsor, rent contract, and commitment not to work. Also, UNHCR was asked to stop registration.

Two surveys were done:

- One in 2015
- One in 2016

To assess, compare, analyze and understand.

Objectives

- Continue to measure perception of Syrian refugees on safety and security, access to services, and analyze the causes behind those perceptions.
- Continue to measure perception of the Lebanese community with regards to Syrians, access to services, and perceived threats to local communities.
- Up to date information about tension levels in the country.
- Comparison of indicators between 2015 and 2016 to evaluate change over time.
- Involve students and professors in research related to Syrian refugees in Lebanon.

Special Thanks

The Political Science Institute would like to thank:

- OURSE (Observatory of the socio-economic reality in USJ) surveyors, Jacqueline Harfouche, and Chohig Kasparian for their support and expertise.
- USJ Ethics Committee and Research Council for their support.
- Surveyors among USJ students, social workers, and Syrian students:
Mario Abd El Ahad, Jassem Alnaemat, Mohammad Belal Alkheja, Dania Bek, Youmna Cham, Khatchig Ghosn, Jomana Khamousia, Nadine Kichly, Sanaa Kordi, Katina Mousaoumay, Tonia Moussaoumay, Rasha Salah, Mousa Shammas, Inès Zaki.
- General Elie Darazi for helping our teams access all areas in Lebanon.
- UNHCR for funding this study via RDPP.

Methodology and Timeframe

Syrian Refugees

- 1200 questionnaire filled in 120 villages sampled according to UNHCR data; sampling in every village according to type of Syrian residence, knocking on doors with random selection in every household.

Lebanese Community

- 600 questionnaire filled in the same villages and same neighborhood; knocking on doors with random selection in every household.

1st Survey: June 18-27 2015

2nd Survey: August 2-17 2016

Sampling

Regional distribution proportional to UNHCR refugee distribution

Final February 27, 2017

Syrian Refugee Questionnaire

Gender/Age/Region of origin/Occupation/etc.

Registration with UNHCR/General Security

Safety level

Feelings towards authorities (Police, GS, Army, Municipality)

Exposure to threat/insult/assault /blackmailing + source + response

Checkpoints/ Curfews/Random checks and patrols

Problems accessing services (Health, Education, Electricity, etc.)

Feelings towards UNHCR, NGOS

Feelings towards Lebanese

Subject to Raid/Search/ Arrest/Eviction/ etc.

Movement restriction

Feeling welcomed?

Similarities between the 2 cultures

Friendships in Lebanon

Return to Syria

Lebanese Questionnaire

Gender/Age/Region of origin/Occupation/etc.

Safety level

Willingness to hire a Syrian refugee

Willingness to have Syrian refugees in neighborhood

Exposure to threat/insult/assault/back mailing + source + response

Checkpoints/Curfews/Random checks and patrols

Interaction with Syrian refugees

Willingness to send kids to school with Syrian refugees

Willingness to marry Syrian refugee

Syrian impact on public services

Positive/Negative impact from syrian refugees

Feelings towards Syrians: hatred/fear/respect/compassion

Similarities between the 2 cultures?

Syrian friendships

Media impact on public opinion

Results

The mapping of work in Syria against work in Lebanon shows that farming skills are unused, as 80% worked in other areas.

Students (of age 18 and above) have not been able to pursue their education (only 9% did).

Other shifts are highlighted in the table...

Relation with Lebanese

Do you feel welcome in Lebanon?

Did you have friends in Lebanon Before you came?

How do you rate your relation with Lebanese?

No major change

Security and Vulnerability

Worries

What worries you most during your stay in Lebanon? 2016

When asked to choose between a series of worries, refugees rated **security highest**. Health came next, followed by Education...

When asked to add other worries, 33% of those who responded mentioned rent, work, and inflation.

Registration and Legal Status

No big change in UNHCR Registration

Registered with UNHCR?

	2015	2016
Yes	78.88	77
No	21.12	23

Main Reason for not having legal residency in 2016: financial (mentioned by 80% of respondents) and inability to find a sponsor (mentioned by 68% of respondents)

Legal Status in Lebanon?

	2015	2016
Have Residency	30.05	21.3
No Residency	69.95	78.7 (44.6 waiting for renewal)

Less have residency papers

Safety

Does your legal residency impact the extent to which you feel safe?

2015:
88.41% feel that residency impacts safety

2016:
96.75% feel that residency impacts safety

Legal Status

In 2016, 21% have their residency, while in 2015 30% had their residency.
 In 2016, 48% of those who have legal residency said it will expire in 1 to 3 months.

Do you have residency? 2015

Do you have residency? 2016

Expulsion	17	7	31	11
Blackmailed	135	116	115	104
TOTAL	1069	658	1402	829

- In 2015, 46% of Syrian Refugees have been victim of abuse while in Lebanon. 69% did nothing about it.
- In 2016, 50% of Syrian Refugees have been victim of abuse while in Lebanon. 72% did nothing about it.
- The percentage of refugees who reported insults, harassment, blackmailing, eviction, etc. by civil society increased from a total of 658 in 2015 to a total 829 in 2016.

What did you do? 2015

What did you do? 2016

Checkpoints

37% had problems with checkpoints in 2015.
58% have problems with checkpoints in 2016.

Problems with Checkpoints 2015

Problems with Checkpoints 2016

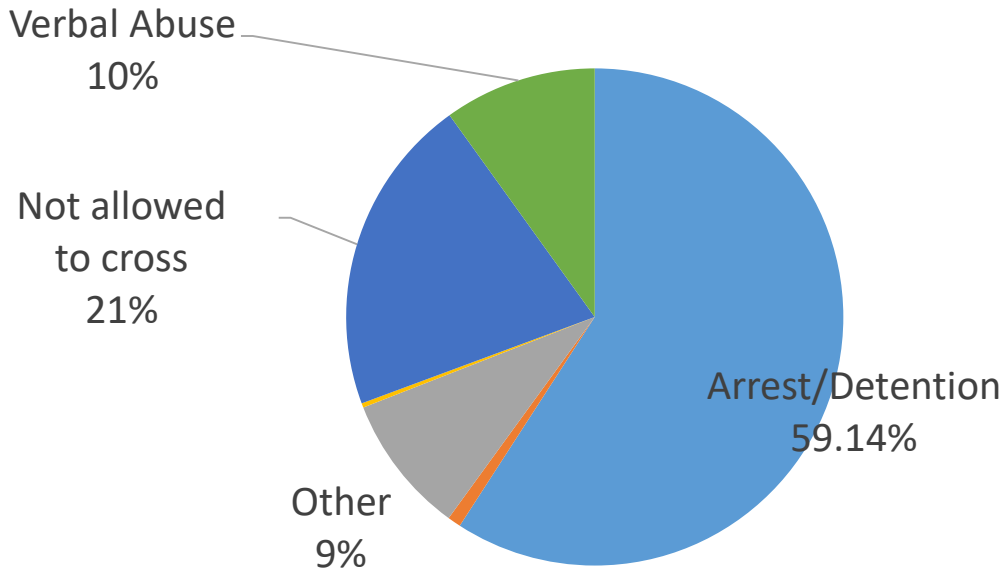

Most respondents said that checkpoints are important to them.
In 2016: 56% of them said the main reason is to go to work, while 23 % mentioned access to services, and 6% mentioned access to aid.

Why are checkpoints important? (2016)

Checkpoints

Type of problems on checkpoints
(2016)

Will you change residence because of these problems?

59% worry about Arrest/Detention on checkpoints, while 21% are worried not to be able to cross, and 10% worry about verbal abuse. Respondents are less likely to change residence in order to solve this problem.

Freedom of Movement

Difficulty to move around?

Who is responsible for your difficulty to move around?

How do you solve this problem?

No noticeable change in difficulty to move around reported by Refugees. However, more refugees realize that this is due to checkpoints (34% in 2016 compared to 18% in 2015).

Perception of Authorities

Approval score of most institutions slightly raised. Less people “don’t know”.

Very good = 5, Good = 4, Don’t know = 3, Bad = 2, Very bad = 0

Relations with	Year	Very Good %		Bad %		Don't know %	Approval Score 2015	Approval Score 2016

Impact on Assault

Assault 2016

Those who don't have legal residency are more likely to be assaulted.

Impact on Checkpoint Problems

Checkpoints problems 2016

Those who don't have legal residency have more checkpoint problems.

Impact on Access to Services

Problems accessing services 2016

Those who don't have legal residency have more problems accessing services.

Preliminary test of the vicious refugee cycle

The model was tested in a stepwise regression against the variable safety.

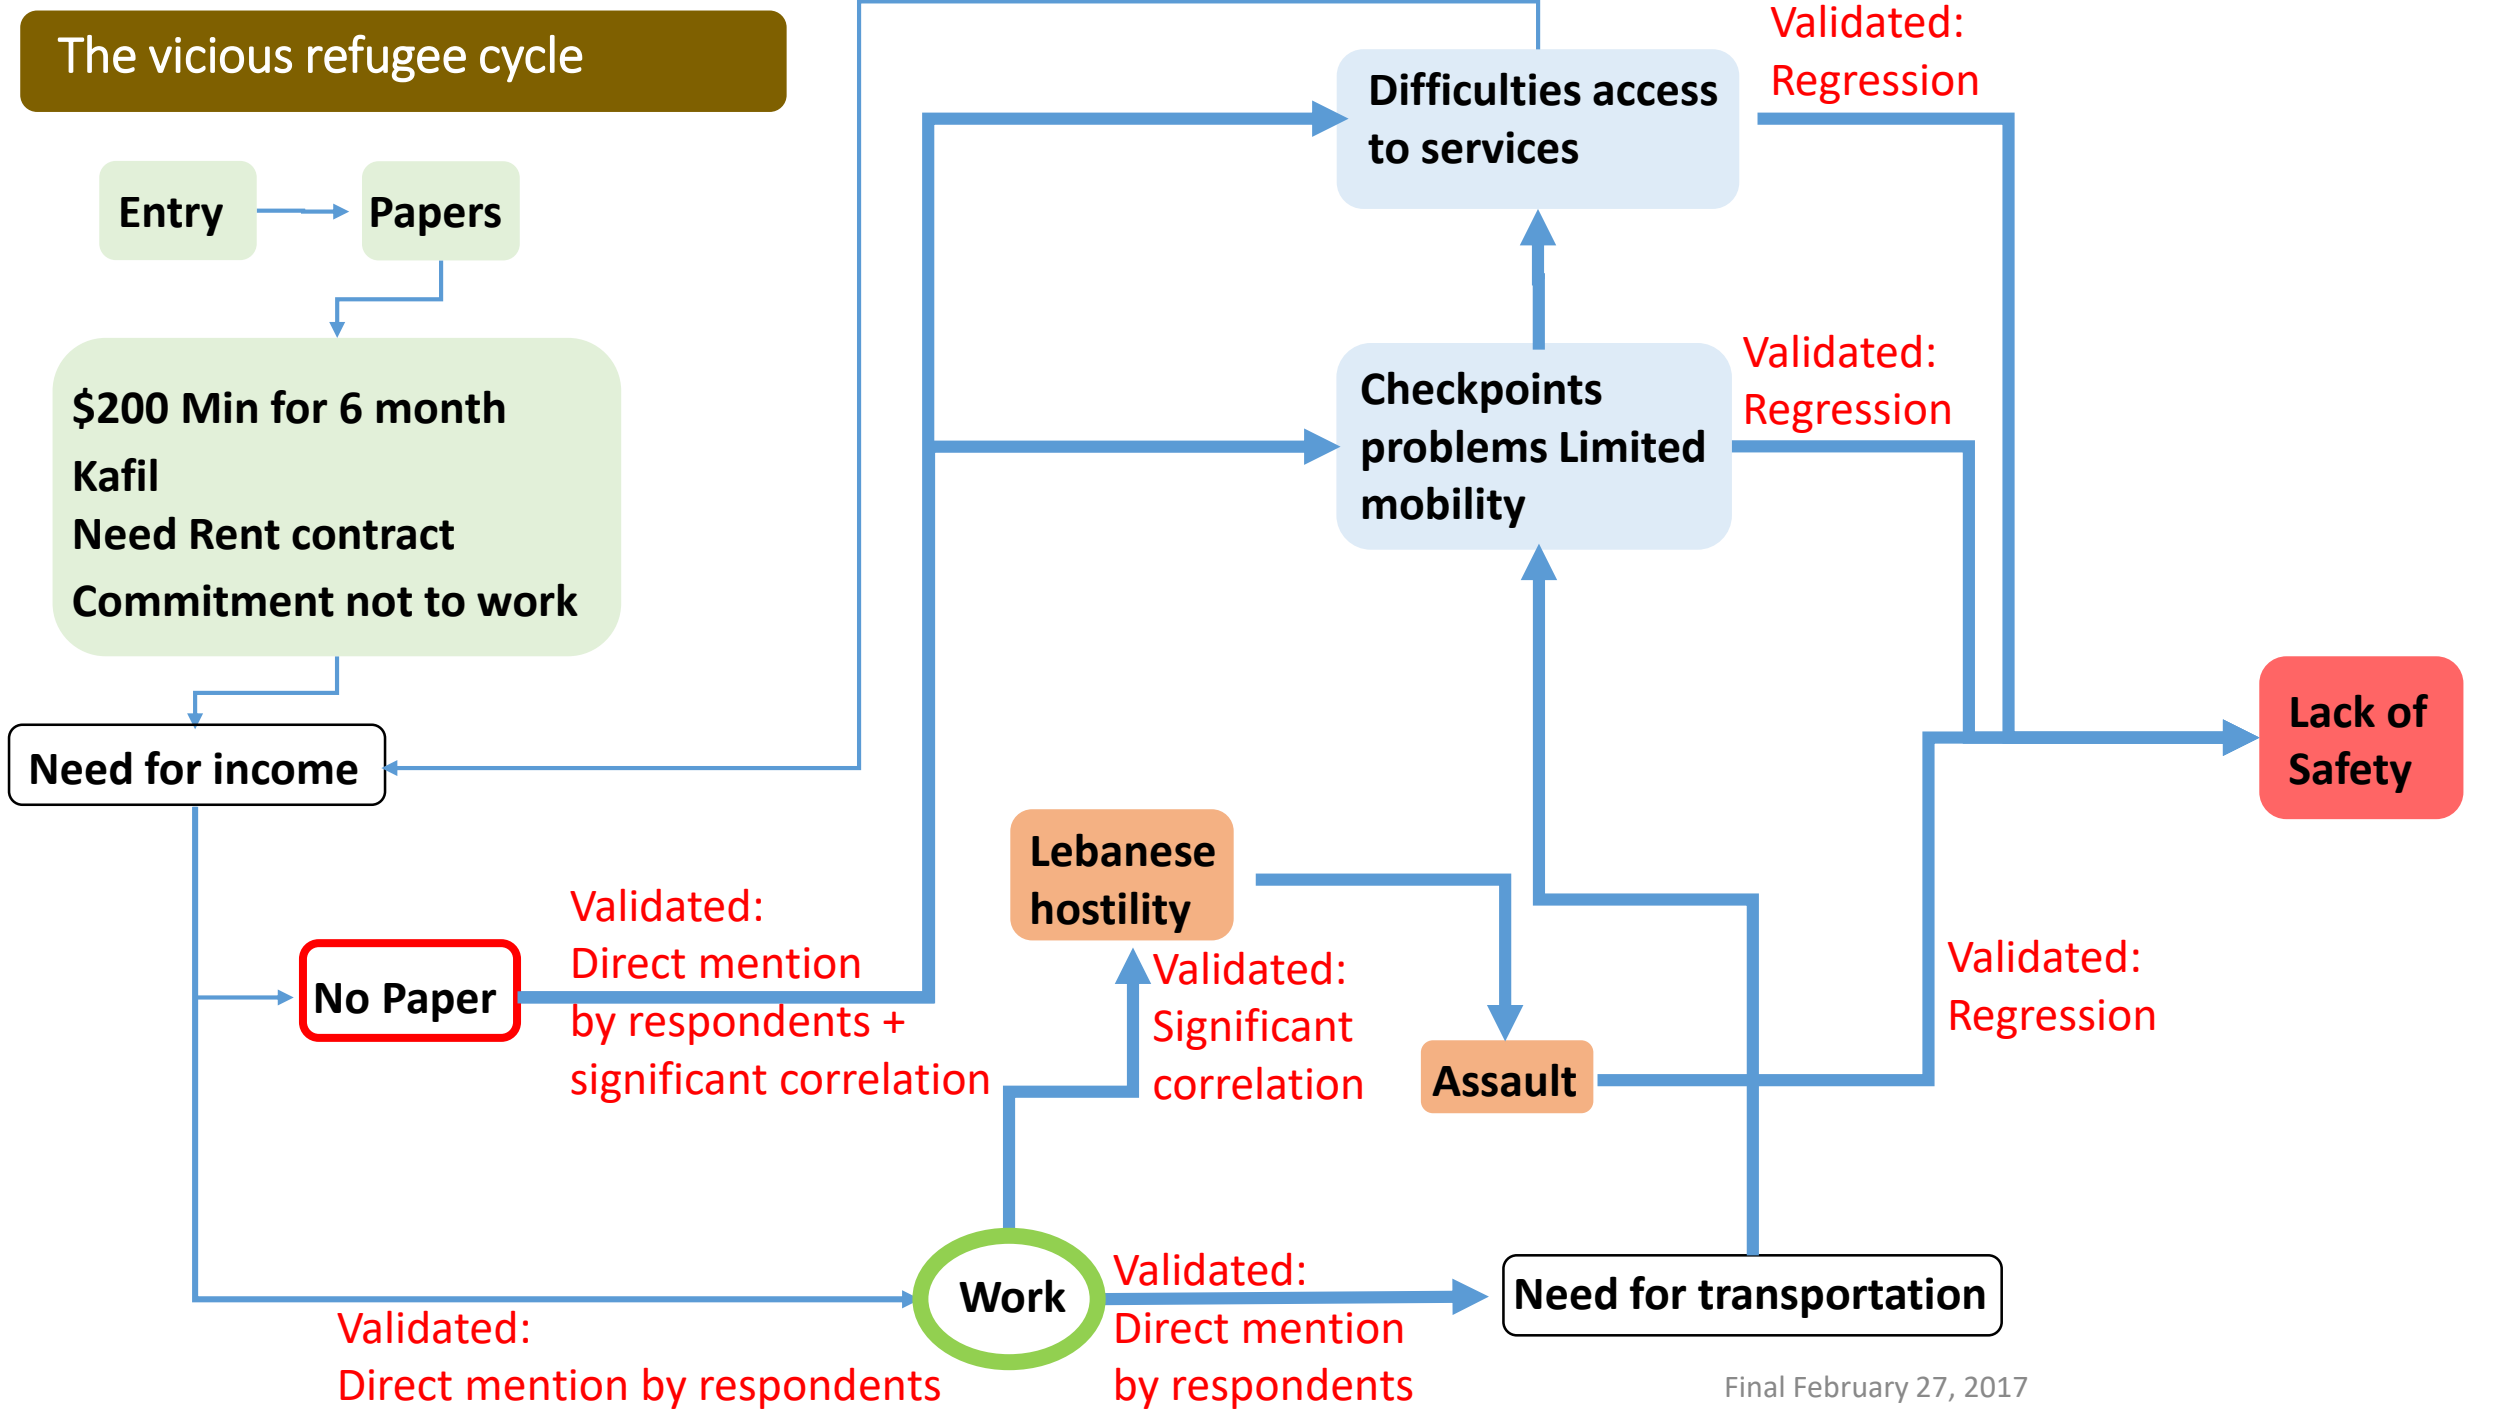

Significant variables are: Checkpoint Problems, Relation with Local Authorities, Access to Services, Mobility Limitation, and Assault. These variables were either coded on a 4 or 5 points scale (depending on the number of answers), or coded as binary dummy variables.

They all turned out significant for 2015 and 2016 with no difference between the two years (“Year” dummy variable not significant).

<i>Regression Statistics</i>

- Extorsion gainst me and family
- Friend insult
- No

Lebanese Perception

Number of reported Syrians assaults increased from 293 to 365, while number of reported Lebanese assaults decreased from 51 to 43

Year	Syrians Assaulted (self and family)	Lebanese Assaulted (self and family)
2015	24.4%	8.5%
2016	30.4%	7%

Assaults reported by Syrians increased and those reported by Lebanese decreased.

Effectiveness of Checkpoints (Lebanese)

Lebanese Perception

Have you recently heard statements expressing hate against Syrian refugees?

40% said they heard a lot of stories expressing hates against Syrian refugees. Most stories were heard in the street, among neighbors, and in the media (mainly TV).

Where?
(number of answers out of 600)

Which Media?
(number of answers out of 600)

Lebanese Perception

Do you think that media impact your perception of refugees?

- 29% of Lebanese respondents think that media impact perception of refugees a lot, and 48% think that the impact is partial.
- More than two thirds says that humanitarian stories about refugees impact them.
- More than two thirds also acknowledge that declarations in the media trigger reactions against refugees, and that media report negative stories about refugees.

Final February 27, 2017

Do humanitarian stories about refugees impact you?

Do you think that declarations in the media are triggering reactions against refugees?

Do you think that media report negative stories about refugees?

Summary

Syrians

Access to jobs	Same
Revenue	Increase
Access to services	Increase
Friendships/Feeling Welcome	Same
Residency Permits	Decrease
UNHCR Registration	Same
Feeling that Residency impacts safety	Increase
Institutional approval score	Slight increase
Assaults against Syrian	Increase
Abuse	Increase
Problems with checkpoints	Increase

Lebanese

Safety	Same
Feeling threatened	Decrease
Relation with Syrian	Same
Willingness to hire Syrian	Slight increase
Assaults against Lebanese	Decrease
Abuse	Decrease
Checkpoint efficiency	Same (High)

On the Syrian side, some resilience is reflected by the increase in access to jobs and services. However, some vulnerability remains with regards to security, mobility, and assaults, due to absence of legal papers. In Parallel, on the Lebanese side, there is an increase in feeling of security, and maybe a slight increase in willingness to hire Syrians.

Nevertheless, Lebanese host communities remain distant socially for Syrian refugees and recognize the impact of media on their perceptions.

Summary

Economic and Social Integration:

- The new survey show the percentage of Syrians working has not changed: 61% in 2016 against 62% in 2015.
- However, average family revenue has gone up: 422\$ in 2016 against 350\$ in 2015.
- The mapping of work in Syria against work in Lebanon shows that farming skills are unused, as only 20% of those working in farming in Syria are doing the same in Lebanon. Students (of age 18 and above) have not been able to pursue their education (only 9% did). Those who had their own business in Syria, don't have this opportunity in Lebanon.
- There is no noticeable change with regards to friendships or whether refugees feel welcome in Lebanon (63 % don't feel welcome in 2016 compared to 62% in 2015).
- When asked to choose between a series of worries, refugees rated security highest. Health came next, followed by Education. When asked to add other worries, 33% of those who responded mentioned rent, work, and inflation.

Summary

Registration:

- While 30% had residency permits in 2015, 21.3% said they have residency in 2016, a decrease in 9%.
- As for UNHCR registration, there is no noticeable change: 79% were registered in 2015, against 77% in 2016.
- A bigger number felt that legal residency impacts safety: 97% in 2016, compared to 88% in 2015.
- Approval score of most institutions slightly raised. Less people “don’t know”.

Summary

Security:

- 293 personal assaults reported by Syrian respondents in 2015 and 365 reported in 2016.
- 86% of these cases were explicitly blamed on Lebanese offenders in 2015 and 87% in 2016. Assault increased in the Bekaa.
- In 2015, 46% of Syrian Refugees have been victims of abuse while in Lebanon, 69% did nothing about it. While in 2016, 50% of Syrian refugees have been victims of abuse while in Lebanon, 72% did nothing about it.
- The percentage of refugees who reported insults, harassment, blackmailing, eviction, etc. by civil society increased from a total of 658 in 2015 to a total 829 in 2016.

Summary

Checkpoints:

- 37% had problems with checkpoints in 2015. 58% have problems with checkpoints in 2016.
- Most respondents said that checkpoints are important to them. In 2016: 56% of them said the main reason is to go to work, while 23 % mentioned access to services, and 6% mentioned access to aid.
- 59% worry about Arrest/Detention on checkpoints, while 21% are worried not to be able to cross, and 10% worry about verbal abuse.
- No noticeable change in difficulty to move around reported by Refugees. However, more refugees realize that this is due to checkpoints (34% in 2016 compared to 18% in 2015).

Summary

- 45% had problems accessing services in 2015 and 29% in 2016.
- 37% said they were treated worse than others when accessing services in 2015 and 42% in 2016.
- Perception of security agencies is lower among refugees who don't have legal residency.
- Those referring to sponsorship as a difficulty with regards to legal registration seem to be more subject to humiliation and less secure.
- The vicious circle of insecurity was tested again and validated:
 1. Lack of residency has a direct impact on Syrian respondents' mobility, access to services, assault, and vulnerability.
 2. This vulnerability has a direct impact on their safety.

Summary

Return and Resettlement:

- 96% of Syrian refugees said they will go back to Syria if things go back to normal.
- 81% said that, if they go back to Syria, they will go back to their place of origin.
- When asked what alternative country they would choose if they could leave Lebanon, 108 mentioned Canada, 65 said “anywhere”, 63 mentioned Germany, 29 mentioned Europe, 28 mentioned Sweden, 17 mentioned Australia, 12 mentioned Turkey, 6 mentioned the UK, 5 mentioned Arab countries, 5 mentioned Holland, 3 mentioned the USA, and the rest were scattered in various other destinations.
- Security and safety are a key requirement for return to Syria.

Summary

Lebanese Respondents:

- There is no change with regards to Lebanese respondents' safety (about 55% feel safe).
- The percentage of Lebanese respondents who heard stories that made them feel threatened decreased from 47% in 2015 to 38% in 2016.
- A higher percentage of Lebanese consider their relation with refugees "normal" (50% in 2016, compared to 37 % in 2015), while less consider that they have no relation with refugees (19% in 2016 compared to 31% in 2015).
- 41% of Lebanese respondents would not hire a Syrian refugee, 45% would not accept refugees in their neighborhood, 57% would not send their kids to school with refugees, and 78% refuse that their children marry a Syrian refugee. Tolerance levels are higher in the Bekaa and the North.

Summary

- Less reference to « stories » and less assaults were reported by Lebanese in 2016. In 2015: assaults reported by 13% of the Lebanese, with a 17% of people saying they “heard stories”. While in 2016: assaults reported by 8% of the Lebanese with much less (6%) saying that they heard stories.
- Assaults reported by Syrians increased and those reported by Lebanese slightly decreased.
- 40% of Lebanese respondents said that they heard a lot of stories expressing hates against Syrian refugees. Most stories were heard in the street, among neighbors, and in the media (mainly TV).

Summary

- 29% of Lebanese respondents think that media impact perception of refugees a lot, and 48% think that the impact is partial.
- More than two thirds says that humanitarian stories about refugees impact them.
- More than two thirds also acknowledge that declarations in the media trigger reactions against refugees, and that media report negative stories about refugees.
