

## La FMD au temps de CORONAVIRUS

Le multitalentueux responsable du service technique Michel Chehwan devenu infirmier.

200 boîtes de masques chirurgicaux (10,000 pièces) ont été acheminés vers l'hôpital pour gonfler son stock en prévision d'une éventuelle pénurie.

Le 11 Mars 2020, au tout début du confinement, tous les locaux de la FMD ont été aseptisés, de même que le centre de soins comprenant les fauteuils dentaires.

Le mercredi 24 mars 2020 s'est tenu le premier conseil de faculté de la FMD en ligne.

Pour les étudiants postuniversitaires, des liens leur ont été envoyés périodiquement pour suivre des webinars et nombreux sont ceux qui en ont profité.

**Webinar**  
for professionals

**CAD/CAM individual prosthetics with 3Shape and exocad**

In this Webinar for professionals, the integration of the digital workflow for the production of individual prosthetics on BEGO Sensation™ implants, in a daily work routine, will be presented. Starting with the download of the attachments files and the integration via the 3Shape or exocad CAD software, the entire process, up to the design of the prosthesis, will be demonstrated by means of an order placement's scenario, using the corresponding CAD packages. Furthermore, this Webinar will provide the facilities for successful program management, very important for the achievement of an aesthetic-functional dental emergency profile. At the end of the presentation, the participants will have the opportunity to join a Q&A session.
